## About the Feedback Community

---

At 99designs, it is important for us to bring our best designers' voices directly to our Product Team. That's why we created our Feedback Community.

Before building or updating features, we invite Top Level designers to participate in Feedback Projects to provide their input through surveys, interviews, user testing and more.

The Feedback Community is a private group with a maximum of 300 members at a time. Memberships are reviewed at the end of each quarter, at which inactive members are removed and new members are invited.
